

## COOKING MEASUREMENTS

Common kitchen equipment used to measure various kinds of ingredients is shown below.

**DIRECTIONS:** Write the equipment you would use to measure each of the following. If you would have to use the measuring equipment more than once, write the number of times you would use it.

	Equipment	Times Used
1. 2 cups flour	1 cup	2
2. 2/3 cup sugar		
3. 2 teaspoons salt		
4. 1/4 cup milk		
5. 3/4 cup oatmeal		
6. dash of nutmeg		

Write the equivalent units for the following:

- |                                    |                                   |
|------------------------------------|-----------------------------------|
| 1. 8 tablespoons = _____ cup       | 5. 1 cube of butter = _____ pound |
| 2. 4 cups = _____ pints            | 6. 16 tablespoons = _____ cup     |
| 3. 1/4 cup = _____ tablespoons     | 7. 1 gallon = _____ quarts        |
| 4. 3 teaspoons = _____ tablespoons | 8. 1 cup = _____ fluid ounces     |
